Release notes version 5.4.3
Document version 1.0

February 9, 2022

Table of contents   Page

1 Introduction

Firmware release **5.4.3** is a release that incorporates a fix for a modem issue.

2 Summary

This software release is a is a hotfix release to mitigate an issue in charging stations produced from September 2021 onwards:

The modem may become defective resulting in loss of communication and, in turn, loss off charging station functionality.

3 Back-end communication changes

None

4 Errorcode changes

None

5 Roll-out heads up

REMARK

Referring to the above mentioned potential modem issue, it is strongly recommended to update your charging station to this latest version 5.4.3
